Priya Dharshini

QA Test Engineer

✉ darshiniramesh1617@gmail.com 📞 8610250429 in LinkedIn ⌗ GitHub

📇 PROFILE

QA Test Engineer with 2+ years of experience in end-to-end functional testing of web-based SaaS and enterprise applications. Strong expertise in manual testing, test case design, regression, smoke, sanity, and E2E testing across multiple business modules. Experienced in requirement analysis, defect tracking, test documentation, and close collaboration with developers and product teams in Agile environments. Hands-on exposure to API testing and basic automation, with a strong quality-first mindset.

🧠 SKILLS

Manual & Functional Testing

- Functional, Regression, Smoke, Sanity & End-to-End Testing
- Web-based Application Testing (SaaS / Enterprise platforms)
- Requirement Analysis & Test Coverage Identification
- Test Case, Test Scenario & Test Report Preparation

AI Tools

ChatGPT, GitHub Copilot, Grammarly

Defect Management & Methodologies

- Defect Logging, Tracking & Verification using JIRA
- Root Cause Analysis & Re-testing
- Agile, Scrum, SDLC, STLC

Tools & Technologies

- JIRA, Confluence, Postman, Chrome DevTools
- SQL (basic data validation)
- Git, GitHub

Automation

- Hands on Selenium WebDriver with TestNG
- Java fundamentals
- Understanding of POM

💼 PROFESSIONAL EXPERIENCE

Associate Quality Test Engineer
Vertis Digital

03/2024 — Present

- Designed, reviewed, and executed manual functional and E2E test cases for enterprise web applications following STLC.
- Performed regression, smoke, and sanity testing before every release to ensure production stability.
- Analyzed business and functional requirements to identify test coverage gaps early in the sprint cycle.
- Logged, tracked, and verified defects in JIRA, ensuring proper closure with development teams.
- Validated UI/UX designs against Figma and ensured cross-browser compatibility.
- Conducted API testing using Postman to validate backend responses and error handling.
- Collaborated closely with developers and product owners during Agile ceremonies and defect triage.
- Supported automation efforts by creating basic Selenium scripts for repetitive test scenarios.

Quality Assurance Test Engineer   07/2023 — 11/2025
Sixseed Solutions LLP

- Executed manual functional, E2E, regression, smoke, and sanity testing for web applications.
- Prepared detailed test cases and test scenarios based on requirements.
- Reported high-quality defects with clear reproduction steps and evidence in JIRA.
- Assisted in release validation and re-testing of bug fixes.

📁 PROJECTS

MarinaBaySands Corporate Site & ArtScience Museum   06/2024 — 11/2025

- Executed manual functional, regression, E2E, and cross-browser test suites.
- Validated AEM page templates, components, workflows, and multi-language content.
- Performed API validations using Postman.
- Conducted UI validation with Figma and responsive checks.
- Wrote beginner-level Selenium scripts for selected UI scenarios under guidance.
- Collaborated during Agile sprints for defect resolution.

SingHealth - Healthcare Services Website   03/2024 — 05/2024

- Designed and executed component-level functional test cases.
- Validated UI structure, responsive behavior, and user flow consistency.
- Supported developers in debugging and verifying issue resolution.

E-Commerce Website

- Designed and executed test cases for registration, search, cart, and checkout flows.
- Conducted UI & cross-browser validation ensuring layout consistency.
- Reported functional bugs with detailed documentation in JIRA

🎓 EDUCATION

MCA-Computer Applications   06/2021 — 05/2023
Bharathidasan University

BCA-Computer Applications   06/2018 — 05/2021
Jamal Mohamed College (Autonomous)

📑 CERTIFICATES

- - Software Testing in Generative AI ⤢
- - Prompt Engineering with GitHub Copilot ⤢
